The Modern Man's Garden

Clean, minimal living: bold, architectural plants create real impact alongside reconditioned materials, whilst flashes of red and silver soften harsh lines. For any cool contemporary with green credentials, this garden is functional and easily maintained.

This garden crosses over a number of gardener profiles. The typical man looking after this garden is a bit of a 'DIY'er and has a very practical approach, looking for labour saving plants and growing systems. He may have a reasonable knowledge of plants. More likely this gardener has an allotment or his garden will include many vegetables and fruit.
