Modular Vertical Growing System

**Multiple** Award Winner

Ball Colegrave™

Each VertiGarden™ module is approximately 50cm high x 40cm wide x 8cm deep and is designed to take 16 plants. Modules are supplied complete with the internal 8 dripper irrigation system, brackets, fixings and full instructions.

Once planted, modules are easily grown-on horizontally but when mounted vertically the irrigation system must be used. Watering of up to three vertically connected modules can be achieved via the VertiGarden water tank. Alternatively, and for larger displays, a pressure regulated irrigation system should be used.

VertiGarden has been tried and tested as a means of providing a seasonal vertical display which can be replanted twice each year in the Spring and Autumn. Trials for use as a permanent 'living wall' are ongoing.
