

Culture Information

Alstroemeria Inticancha[®]

Plant type:	Half hardy Perennial
Uses:	Pot plant and patio containers
Flowering period:	June to November
Plant height:	30cm

Approximate crop timing (mid season)

Ball 44 (5cm) plug	Pot week 6 - 8 for flowering plant end June/early July. Pot week 20 for flowering plants from August.
--------------------	---

Growing on:

Temperature	Grow under cover at an average temperature of 12°C - 16°C. Make sure that the humidity is not too high during the Winter months.
pH	5.8 – 6.0
Feeding	Start feeding around 1.8 EC, on the end of the crop around 2.3 EC. Low nitrogen and high potassium is needed for a strong plant.
Compost	Pot into a well aerated compost with a base feed.
Growth regulation	Not necessary.
Pack/Pot size	3 litre pot or larger, 1 plug per pot
Advice	Make sure that the plants are kept sufficiently moist.
Common pests	Thrips, Aphids, Red Spider Mite, Slugs
Common diseases	Ensure plants are given good ventilation. If necessary apply a protectant chemical treatment to prevent the development of Botrytis.

Ball Colegrave cultural information is issued as a guide to growers, based on our own trials experience. It is not intended as a blueprint for growing. Any chemicals referred to should be used only in accordance with the manufacturer's instructions.
