A Primrose for all seasons...

The Ball Colegrave range of **Primrose** has been specially selected to make it easy for you to schedule a 6 month programme. Each series is well matched for uniformity, colour range and attention grabbing bi-colours to keep your sales sweet.

All varieties are available as seed. Our high quality Ball 230 and 350 plugs are available across the optimum delivery weeks for you to target your key sales window:

Bonnelli	October to mid February
Fruelo	January to mid March
Alaska	end January to March
Husky	mid February to April

Pansy & Viola – a cut above the rest ...

Pansy Matrix™ has become the first choice Pansy for pack production. Why? It's simple. The world's leading breeders have design-engineered **Matrix™** to exacting UK grower specifications. Its superior branching means **Matrix™** covers the pack faster, resists stretching and offers greater uniformity of habit and earliness of flowering. And with 30 colours and 18 mixes, there is plenty of choice for everyone.

Viola Sorbet™ is an established variety with proven performance in pack, pot and garden.

Its neat habit and adventurous range of colours make this series a world leader. The **XP** range of **Sorbet™** offers our best matched **Sorbet™** varieties with advanced genetics to give an even higher level of uniformity of flowering and habit across all colours. We recommend **XP** where nothing but uniformity is acceptable, plus some added benefits of novelty colours.

Pansy Cool Wave™ is the next generation of Trailing Pansy from seed, opening up a whole new Pansy market in baskets and containers. No other series exhibits the natural 'break', spread and trail features across all its colours that **Cool Wave™** can offer. In the garden **Cool Wave™** simply won't dissappoint with its exceptional overwintering performance and being the first Pansy to break colour in the Spring!

Follow **Cool Wave™** on Facebook and Twitter, register as a stockist or personalise your own POS programme. Just [Click Here](#) to get started.

All Ball Colegrave Pansy and Viola are available as seed or plugs offering a full 12 month window of sales opportunities.
