

The 2016 Spring Additions Is Out Now

## New products create new retail sales opportunities

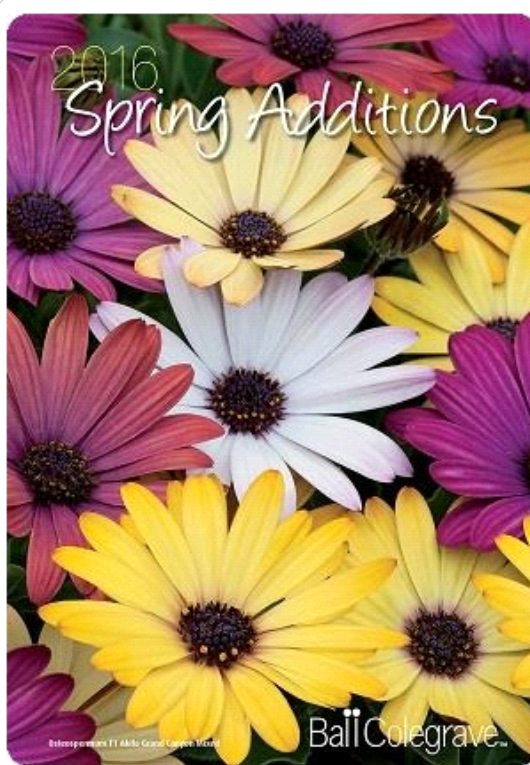

Since the release of our 2016 Plant Catalogue, we have extended our product offering with over 100 great new introductions, featured in the **2016 Spring Additions** brochure.

For those who visited us this summer, you will recognise many varieties in this list. The 'Blue Flag' award scheme was as popular as ever with a clear winner **Petunia Night Sky**; a completely different look that is sure to be a 'must have' plant at retail.

**Coleus Campfire** ran a close second with its vibrant and contrasting bronze foliage, heavily contested by the **Osteospermum 3D** offering the second generation of double flowered forms that stay open during the higher temperatures of summer.

Our comprehensive Begonia offering is greatly enhanced with three new series.

**Northern Lights** is a wonderful series of double and semi-double flower forms that

NEW Osteospermum F1 Akila Grand Canyon Mixed

will add more colour and interest to your basket and container offering. **Sweet Spice** is set to be a huge hit with consumers once they smell that unique fragrance. **Fortune** offers a tuberous series with great garden and container versatility in a wide colour range.

We are also delighted to launch in this 2016 Spring Additions brochure our new range of **Whetman Pinks**. From our extensive trialling this year we have chosen two ranges;

The traditional **Garden Pinks** border range includes varieties such as 'Doris', which as a variety has stood the test of time and of course many of you will recognise. Be sure to have a look at the range, there is a whole new generation of customers that have not enjoyed these varieties before.

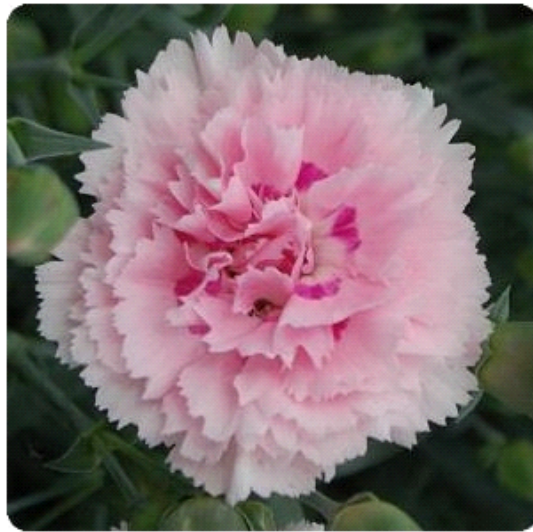

The **Scent First** range features some of the very latest breeding in Garden Pinks with the added attraction of scent for today's high impulse market.
