

A quick and easy solution to late container and basket production

Ball®

Make container planting quick and easy!

Speedplanter

The market for pre-planted patio baskets and containers is growing fast. But when the bedding season is in full swing and nursery space is at a premium, producing high impact colour planters simply becomes almost impractical.

The **Speedplanter** however, offers busy Grower-Retailers a great solution to produce a fast-turn premium colour planter in just 2 to 3 weeks, saving you time and space when you really need it most!

How? It's unbelievably **Quick** and **Easy**...

A special 30cm wide net pot pre-planted in a range of popular colour themes is placed on top of a patio container or basket simply filled with compost. Just add water and within a few weeks the net pot has rooted through for a highly colourful retail ready planter.

Key features:

- 9 colour themes to choose from
- Select from both basket and container options
- 7 plants included in each Speedplanter
- Suits production of baskets and containers 30cm or wider
- Supplied as a trolley of 70 planters

Drop a Speedplanter into a filled planter

Provides spectacular garden colour made easy

**Good availability still for week 22 and 23...
but hurry, Speedplanters are selling fast !!!**
