NEW	Lavender	Dark Green	Vigorous	Mid
NEW	Orange	Green	Medium	Mid
NEW	Scarlet Red	Green	Medium	Mid

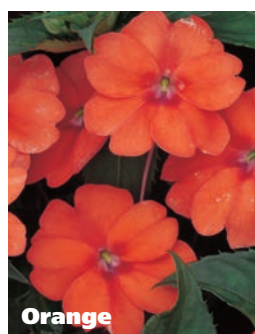

**in relation to the series profile in a pot*

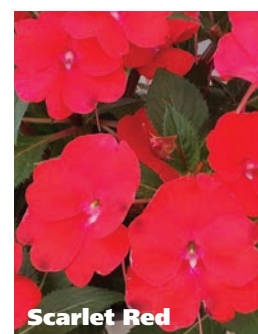

Clear White

Lavender

Orange

Scarlet Red

Special Tips: SunPatiens®

SunPatiens® are not New Guinea Impatiens. They instead feature a much more aggressive root which allows Growers to establish their plants faster in pots under cooler growing conditions and thus saving energy costs. Root development for SunPatiens®, unlike other Impatiens, works best at 12-16°C and plants will grow from as low as 6°C!

SunPatiens® are extremely responsive to water uptake. So, the more water you apply, the taller your SunPatiens® will grow. Therefore to control plant growth and develop a well-conditioned plant we recommend, once roots are established, allowing the plants to dry between irrigations. Waiting until the plants show a slight wilt before watering promotes a strong root system and increases uptake of calcium for sturdy, healthy stems and leaves. As the plant matures, the more water stress the plant can tolerate.

SunPatiens® do not need pinching, they are naturally branching!
