# 2019 Summer Highlights

The Ball Colegrave Annual Summer Showcase is one of the UK's premier trade events. With over four acres of seasonal plant displays and variety trials, set in the heart of Oxfordshire.

Trade Visitors and Home Gardeners alike, voted for their favourite variety using a blue marker flag.

The following pages present a taste of the Summer Highlights voted for by our visitors.

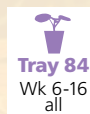

OSTEOSPERMUM

# FlowerPower Purple Sun (P)

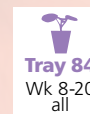

It's easy to see why this is a multi-award winning variety! The extraordinary colours of the large, early flowers virtually smother the dark green foliage throughout the summer. The ochre yellow petals develop into the most vibrant of orange colours, whilst retaining the characteristic purple centre and stay open even on the hottest of days. A naturally compact, well branched and mounding variety, ideal for 10.5 – 13cm pots and containers.

For more information, please see page 268 of the 2020 Plant Catalogue.

This intergeneric hybrid combines the best qualities of Calibrachoa and Petunia for outstanding results! The amazing colours of this compact-medium habit and mounding plant can be blended together to make some beautiful mixed displays. BeautiCal® makes growing and marketing easy; suitable for cold crop production, good mildew resistance, early flowering, non-sticky foliage, more pH tolerant than Calibrachoa and excellent wet weather tolerance. Ideal for 10.5 – 12cm pots, baskets and containers.

For more information, please see page 270 of the 2020 Plant Catalogue.

PETCHOA

# BeautiCal® Cinnamon (P)

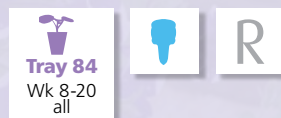

PETUNIA

# GlacierSky (P)

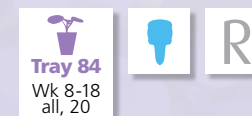

This novelty flower with its constellation of stars edged with the 'ice' effect margin really wowed customers at this year's Summer Showcase, choosing GlacierSky as their overall favourite variety! The uniqueness is also revealed in the high weather resistance, semi-trailing and strong branching habit, which in combination with a stable colour pattern and a great shelf life makes this a real 'standout' plant.

For more information, please see pages 278-279 of the 2020 Plant Catalogue.

This new class of cutting-raised Lobelia brings an exciting new option to the patio container market. Infinity 'packs a punch' of rich luminescent colours on upright plants, which then mound for a great fill in the pot. Plants hold a good tight branching shape, ideal for selling 10cm to 1 litre pots in colour without plants tangling! This variety is 'day length neutral', so Infinity flowers early in the season and then just keeps going all summer long.

For more information, please see page 258 of the 2020 Plant Catalogue.

LOBELIA

# Infinity Blue

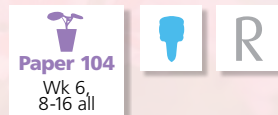

GERANIUM

# Marcada® Pink with Purple Eye (P)

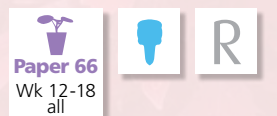

This high impact, interspecific hybrid possesses all the best qualities of both Ivy and Zonale Pelargoniums; early, prolific and continuous flowering, tidy shape, semi-trailing, high weather resistance and self-cleaning. Marcada® is perfect for 11-15cm pots and with its great flower retention looks great on the retail bench. Ideal for basket, containers and a popular choice for window box displays.

For more information, please see page 240 of the 2020 Plant Catalogue.

The stunning rich colours, naturally compact, free-branching habit and uniquely shaped leaves of Flame Thrower make these a breeze to grow and sell. A versatile variety suiting small to larger premium pots and combination container plantings. It's late flowering and suitability for either full sun or part shade position in the garden means this Coleus looks good everywhere, all the time!

For more information, please see page 197 of the 2020 Plant Catalogue.

COLEUS

# Flame Thrower Salsa Roja

LAVANDULA

# Blue Spear

The bigger, taller spikes of intense blue-purple colour makes Blue Spear the showiest hardy English Lavender from seed you can grow and sell. The well-branched, bushy plants are easy to grow. Their tidy shape, early flowering and uniformity make it ideal for pot tight production and looks great at point of sale. Suitable for 10.5 – 13cm pots or larger 2 litre pots with multiple plugs per pot. Because Blue Spear is produced from seed, the risk of importing Xylella is eliminated.

NEMESIA

# Sundae Forest Fruits

# BEACON™ IMPATIENS

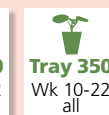

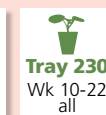

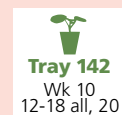

For more information, please see  
pages 78-79 of the 2020 Plant Catalogue.

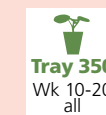

Through devoted breeding efforts the Beacon™ series of Impatiens is here, bringing with it high resistance to Impatiens Downy Mildew and the promise to home gardeners of reliable, season-long and fast-filling colour to the garden. Plant habit, flowering time and flower size is similar to other Impatiens walleriana, so is easy to incorporate into production planning. There are no special plant culture or fungicidal spray programmes required with Beacon™. Since there is no dependency on protectant fungicides, this dramatically reduces the chance of chemical resistance developing.
