

# 2021 Perennial Additions

Rudbeckia  
Sunbeckia  
Sophia (P)

***We are excited to bring you some new additional Perennial lines following our evaluation this summer. These varieties performed well and as a result we have made them available for the 2021 season...Order early to avoid disappointment!***

Baï Colegrave®

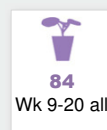

ACHILLEA

# NEW Peter Cottontail

(*A.ptarmica*)

## Unique habit & flower form

- Clump forming herbaceous perennial with glossy green foliage
- Multiple large, ivory-white flowers are produced over many months
- Strong repeat flowering performance
- Despite the name this variety is resistant to deer & rabbits
- Flowering June – August
- Height up to 45-60cm
- Our Ball 84 is recommended for planting into a 3 litre pot either planted directly outside, or in a well ventilated polytunnel. Pinching may be required initially to assist in the bulking up of this perennial.

ACHILLEA

# NEW Sassy Summer

(*A. millefolium*)

ACHILLEA

**NEW** Sassy  
Summer  
Sunset

**Exciting new garden performer that also present well at retail**

- Tall upright habit with mid-green fern like foliage
- Sturdy habit, stems not collapsing during production and lower foliage does not yellow when grown close together.
- Uniform habits within the series
- Multiple flowers on each plant
- Our Ball 84 plug is best grown in a 3 litre pot, either directly outside or for the earlier weeks an initial period in a well ventilated polytunnel may be advised.

AGAPANTHUS  
**NEW** Summer  
Love™ Blue  
(*A. africanus*)

**Dwarf variety, bred for pots and an extra-long flower season**

- Floriferous variety producing multiple lavender blue flowers over a long period
- Flowering from May through to September
- Compact habit up to 50cm
- Recommended for growing in 3 litre pot grown under a frost-free glasshouse. The key to success is preventing the plants from sitting too wet through the winter

AGASTACHE

## NEW Little Adder

(*A. rugosa*)

### Free flowering, non-brittle variety

- First year flowering herbaceous perennial, with masses of small blue-purple flowers
- Superb plant for pollinators and aromatic foliage add to the interest
- Compact habit compared to Black Adder. Little Adder is roughly 38-46cm tall when in flower
- We recommend growing on in an open sided polytunnel in a 3 litre pot for flowering in 8-10 weeks. 1-2 pinches is advised to shape the plant during its development
- Flowering from end of May through to August

BRUNNERA

# NEW Alexandria

(*B. macrophylla*)

## Mirror-silver foliage form to partner the popular Alexander's Great variety

- Vigorous mound forming herbaceous perennial
- Sky-blue flowers produced on short stems during spring and early summer
- Superior genetics only one plug is required to grow a 5 litre container in 8-12 weeks
- Our paper 84 plug is recommended to be planted in a 3 or 5 litre pot under a well ventilated, slightly shaded polytunnel to produce an impressive plant the following spring.

CUPRESSUS

## NEW Snowcrest®

(*C. macrocarpa*)

### Unique colourful Cupressus

- Fresh green foliage is tipped with white variegated foliage making it an ideal solution for mixed planted containers.
- We recommend planting our Pot 18 plug either directly into a mixed planted container or for a larger pot why not plant up into a 3 litre pot for spring sales.

CUPRESSUS

## NEW Goldcrest®

(*C. macrocarpa*)

### Popular lime-green foliage variety

- Aromatic lime-green foliage ideal on a small compact conifer.
- We recommend planting our Pot 18 plug either directly into a mixed planted container or for a larger pot why not plant up into a 3 litre pot for spring sales.

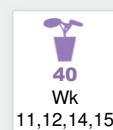

DAHLIA

## NEW Mystic

(*D. x hybrida*)

**A striking combination of deep mahogany foliage and rich coloured blooms**

- Dark purple almost black foliage with bright, vibrant & cheerful flower colours
- Popular middle of the border varieties to make a real statement
- Perfect plant for pollinators providing a source of nectar over many months
- Flowering July – October
- Height up to 120cm
- Our Ball 40 plug is ideal for planting into a 5 litre patio pot in a well ventilated polytunnel for summer sales
